**Science.
Applied to Life.™**

3M Plant Site in Corona, California

It starts with purpose

3M has always been a purpose driven company. We unlock the power of people, ideas, and science to reimagine what's possible. The power comes from connecting purpose to our performance. Our purpose provides 3M employees a powerful framework within which to make decisions and ensure that we meet the expectations of our stakeholders. More than ever, we need science to create a more positive future where everyone can thrive. The resilience of our planet, our people, and our economy depends on it.

Our approach and promise

Dedicated to science and innovation, 3M has taken on global challenges and developed new solutions for our customers for over 120 years. But as the needs of the world have changed, so has our commitment to leading the way forward. All products that enter 3M's new product commercialization process must have a Sustainability Value Commitment demonstrating how they drive impact for the greater good.

Product solutions

Within this piece, you will find three examples of products sharing 3M's commitment to sustainable solutions. 3M's New Post-it® 100% Recycled Paper Super Sticky Notes are made from 100% recycled paper and feature 2X the sticking power to make sure your message stays put. The water based adhesive reliably sticks to doors, windows, and walls, so you can take your notes anywhere. Succeed in your everyday tasks and feel good knowing these notes are made in a zero waste to landfill plant. Packaging is also made from 100% recycled paper. All Post-it® Notes are recyclable.

Also featured, is Scotch® Cushion Lock™ Protective Wrap. A sustainable alternative to plastic bubble that expands, eliminating the need for additional void fill material. Use up to 60% less to fill a box vs. plastic bubble and other expanding paper wraps. It is made with 100% recycled paper and is 100% curbside recyclable.

To top it off, Scotch® Magic™ Greener Tape has all the strength of our Magic™ Tape but is made from over 65% recycled or plant based material to make it the more eco conscious choice. Works like magic because it's just like Scotch® Magic™ Tape. Only Greener.

These are only a few examples of 3M's commitment to sustainable solutions. Look for more to come throughout 2023.

Sustainable.
Reliable.
Affordable.

FINALLY

ENVIRONMENTALLY RESPONSIBLE

PREMIUM PAPER TOWELS

Would you like to provide a premium paper towel to your valued employees and guests, but don't like the idea of cutting down trees or clearing forests to do so? Now, you no longer have to choose.

Marcal Paper's new NTT paper machine, located in Natchez, Mississippi, provides the latest, cutting-edge technology to produce a high-quality towel with a premium look and feel - made from 100% recycled fiber and Green Seal® Certified.

THE NTT ADVANTAGE

Marcal's new NTT technology provides 50-80% more bulk and improved softness over conventional paper toweling. Additionally, unlike TAD (Through-Air-Dried) premium toweling that is extremely energy intensive to produce, NTT Premium Toweling requires much less energy as well as a reduction in raw materials - allowing for a premium product at a less than premium price.

Contact your Marcal Regional Manager today so that you no longer have to choose between "Premium" and "Environmentally Responsible."

Lorell – Greenguard Certified

We think it is important to do our part. Look for the Recycle symbol and the Greenguard Certification Logo to find Lorell products that contain recycled material.

GREENGUARD Certification ensures that a product has met some of the world's most rigorous and comprehensive standards for low emissions of volatile organic compounds (VOCs).

Kimberly-Clark Professional is committed to leading the way to zero waste in landfills. That's why we created The RightCycle™ Program — our industry-changing initiative that takes recycling personal protection equipment (PPE) to a new level. Instead of used PPE such as protective clothing, nitrile gloves and safety glasses going into the trash (and landfills), these previously hard-to-recycle items are collected at your facility and turned into new consumer goods.

The Rainforest Alliance Certification Program

The seal means that the certified product or ingredient was produced using methods that support the three pillars of sustainability: social, economic, and environmental. Independent, third-party auditors—critical to the integrity of any certification program—evaluate farmers against requirements in all three areas before awarding or renewing certification.

The Rainforest Alliance chose the red-eyed tree frog as its mascot more than thirty years ago, as this bright-eyed amphibian is commonly found in the neotropics, where our founders first started working to protect tropical rainforests. Since then, our frog seal has become an international symbol of sustainability.
