TherMobile

Safety and mobility rolled into one.

BEHIND THE DESIGN

As an essential business serving healthcare providers and government agencies during the current COVID-19 pandemic, the safety and wellbeing of our employees is our highest priority. To contain the virus and keep our employees safe as they continue to work, Clarus evaluated our own resources and premium materials to find innovative ways to aid in their protection.

As a result, we transformed our mobile product into a shield with a cutout to facilitate taking temperatures from a safe distance. Not only did it give our employees peace of mind knowing there was now an extra layer of protection during the screening process, but also that this new shield could be wiped clean of all germs, thanks to the non-porous nature of glass.

We immediately realized that there are thousands of other businesses implementing the same safeguards to keep their people safe during the pandemic. We knew we had something special, so we went straight to work to figure out how to manufacture this product as quickly as possible to help keep people safe.

The Clarus TherMobile production is ramping up to support you!

To find out more information or to place an order for TherMobile, please contact your local sales representative.

HEALTHFLEX DIVIDERS

The Healthflex divider provides privacy in health care facilities for immunizations, physicals, nursing care, and other health related situations. A factory applied antimicrobial coating protects the panels from the spread of germs.
